

good work here Luke, Interesting research area. good title Abstract is correct in form: lengthen; give a sentence from each section; give actual specific results intro does establish Territory and niche with academic perspective. 1) Establish the Territory for a disciplinary audience: 2) Establish the Niche: under-sourced as yet. work harder to prove GAP exists 3) Occupy, fascinating, but not yet earned detail in background is improved. your sections here lend real theory to the study ... but we were surprised to see analysis creeping in into the background section. rethink overarching structure headers and subheaders can get confusing: section structure was unclear throughout. good work in analysis: looks like some very robust findings. after discussion , write a separate conclusion section: that pushes future thinking in the field . Some real possibilities here! Thanks for the effort!!
